

How to Enable/Edit the Notification Bar

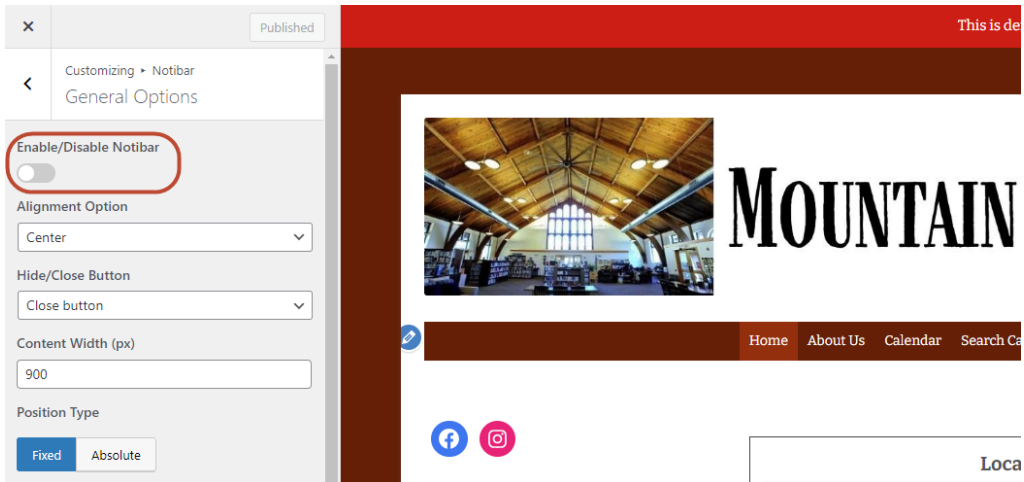

1. Log into your website's dashboard.
2. Navigate to the Customize area. Appearance > Customize.

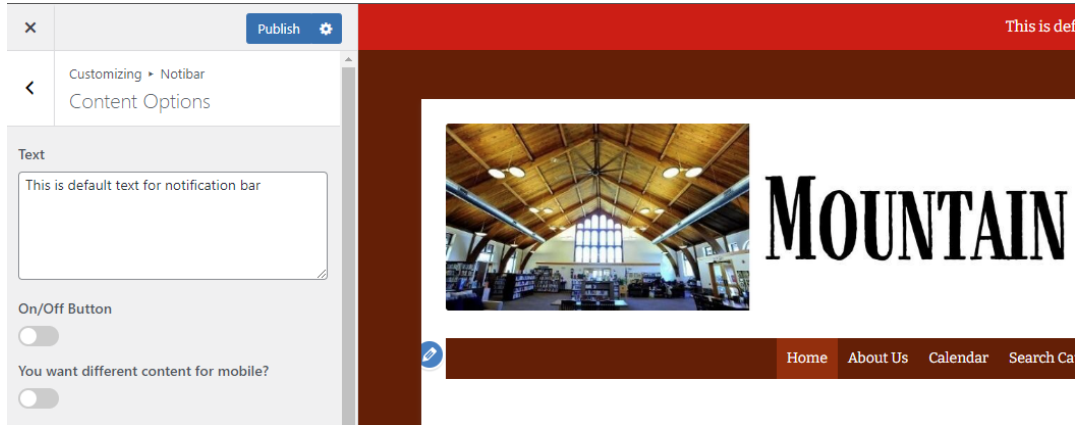

3. Enter the "Notibar" section.

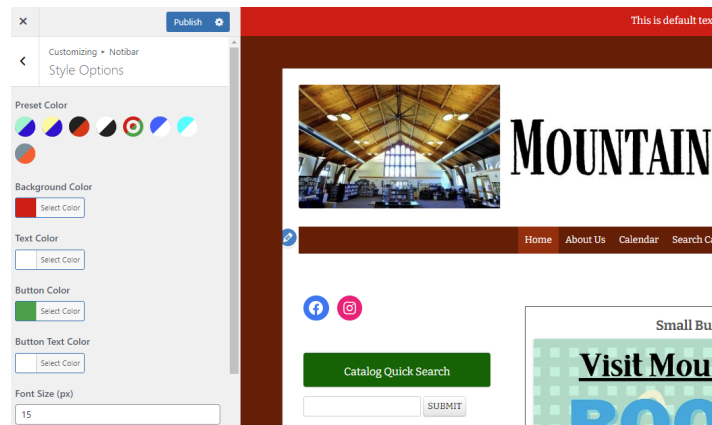

4. Under **General Option**, you will find the option to enable/disable the notibar. This is the control for displaying or hiding the bar.

5. Under **Content Option**, you will find the option to update the message. If you want/need to a link, you can do this through the button option.

6. Under Style Options, you can change the color and font size. There are a couple of presets as well as the option to select custom colors.

7. Once everything is set, make sure to press **Publish** to confirm the changes.
